Education

University of Michigan, Master's in Computer Science and Engineering, 2026 – 2028, Ann Arbor, MI, USA

- Fall 2026: Human-AI Interaction and Systems (CSE 594), Advanced Database Systems (CSE 584), Computer and Network Security (CSE 588)

The NorthCap University, B. Tech Computer Science (AI/ML), 2021 – 2025 - Gurugram, Haryana, India

- **CGPA:** 8.94/10 (3.65/4)
- Received **10-grade points** in **C, Java, and Python** programming subjects.

Professional Experience

Kotronix Technologies, Silent Director, August 2026 - Present

Sole Proprietor, On-site, February 2025 - August 2026 - **New Delhi, India**

- Led service and maintenance of 24 DC fast charger guns, **achieving ~87% cost savings** compared to replacement for Lucknow City Transport Service Ltd. (LCTSL).

Skills: High-voltage DC systems, electrical diagnostics, preventive maintenance, troubleshooting, safety compliance, government project coordination, business development

ISRO (Indian Space Research Organisation), Project Intern, On-site, 7 months, June 2024 - December 2024 - **New Delhi, India**

- Applied computer vision and large language models to rooftop and sand dune extraction tasks from satellite/aerial imagery.
- Developed an **AI-powered disaster monitoring platform** on **NRSC, ISRO Delhi servers**.
- Built an **automated data pipeline** using **NLP and AI** to extract disaster type, sentiment, and location from **news feeds**, improving relevance **5X** over keyword-based methods.
- Designed a **PostgreSQL database** and **React.js dashboard** with advanced filtering for **real-time and historical disaster analysis**.
- Conducted **data analysis** for disaster trends, integrating **Python, Node.js, and AI models** for real-time insights..

Skills: AI/ML, Data Analysis, Predictive Analytics, Python, PostgreSQL, Node.js, React.js, Data Visualization

Rancho Labs, Python and AI Intern, Remote, 4 months, 15 June 2023 - 15 October 2023 - **New Delhi, India**

- **Facilitated learning** by preparing **educational materials and projects** on machine learning concepts.
- **Created practical projects** demonstrating machine learning algorithms and concepts.

Skills: Python, ML Algorithms, CNN

Leoforce, Intern, Remote, 2 months, 25 May 2023 - 25 July 2023 - **Raleigh, NC, USA**

- **Designed and implemented** interactive **playgrounds and dashboards** for Quality Assurance testing of AI products.
- **Collaborated with the Data Science team** to develop and test AI models, improving **testing efficiency**.

Skills: JavaScript, REST API, Kubernetes, GitLab

Research and Teaching

-
- A research paper titled "*Automated Natural Disaster Monitoring from Online News & Social Media Posts Using Sentiment Analysis & GIS*" published in Springer Nature's Earth Systems and Environment. DOI: [10.1007/s41748-026-01305-1](https://doi.org/10.1007/s41748-026-01305-1).
 - Appointed as a **peer tutor** for **Python and Cyber Security** at The NorthCap University.
 - Taught Android development online with live classes for the university students as a core member of the Google Developer Student Club.
 - During internship at Rancho labs taught high school students the basics of artificial intelligence and machine learning

Personal Projects

- **Offensive Check Model** – An NLP-based AI model that predicts whether input text is offensive using various machine learning algorithms. Built with Streamlit for the UI and deployed online with 86% accuracy. [Live Demo](#)
- **Event Hub** – A Kotlin app using Jetpack Compose that enables college clubs to publish and view upcoming events. Implemented navigation, splash screens, and dynamic layouts. [GitHub Repository](#)

Volunteer Activities and Community Engagement

- Completed 560 plus community service hours during coursework at The NorthCap University (2021 - 2025)
- **CWE (Catalyst for Women Entrepreneurship)**, Intern, Remote, 1 month, May 2024 – June 2024 - **Bangalore, India**
Tailored a custom data automation tool that streamlined admin database cleaning, reducing 5+ hours of manual work to seconds
Skills: Data Analytics, Python, Mailchimp, Data Cleaning, Automation
- **Scholar Stack (Beta Project):** Platform where students can share quality notes and receive community service hours based on originality, quality, and effort. [Website](#)

Honors and Awards:

- **Copyright granted** by the Copyright Office of India for “*Automated Disaster News Alert System*” (2025)
- Awarded a **25% merit scholarship** every semester at The NorthCap University

Industry Knowledge & Skills

- **Development:** Android Development, Web (React.js, Flask, CSS), Backend (MySQL, Python), Cloud (Google Cloud Platform), Git, Github
- **AI/ML:** Data Cleaning, Analytics, Visualization, Large language models (LLMs), Deep Learning, NLP, Computer Vision
- **Programming:** Python, Java, Kotlin, C , JavaScript , Dart
